PROJECT

College and Hostel Recommendation System (Present-2024)

Role: Managed Database Operations with MY-SQL

Developed a recommendation system using Java that suggests suitable colleges and hostels based on user preferences. Utilized object-oriented programming principles to design a modular and scalable system.

Health and fitness Recommendation (Oct-2024)

Developed a comprehensive desktop-based Fitness Tracker application using Python and Tkinter, aimed at helping users manage their fitness goals through personalized diet and workout plans.

The application calculates daily caloric needs based on user inputs such as weight, height, age, gender, and activity level.

Restaurant Website (Dec-2023)

Designed and developed a fully responsive restaurant website using HTML5 and CSS3, ensuring cross-browser compatibility and mobile-first design principles..
